PROJECTS

ATS(Application tracking system)

05/2024 – present

An Applicant Tracking System (ATS) streamlines the recruitment process by automating many stages of hiring, from posting job ads to screening candidates and managing interview workflows. Key outcomes include improved efficiency, as it reduces time spent on manual tasks, and better candidate tracking, allowing recruiters to organize applications and identify top talent more easily.

Grameen Chatbot

05/2023 – 07/2023

In this project, to provide a convenient accessibility for agriculture information and expert advice for farmers, villagers, individuals in any language through the mobile application. This app is designed for the government where the application is helpful to provide expert solutions to farmers by the chatbot and expert team appointed by the government. We will be using a database tables posted on google cloud services which stores the information about all the queries like agriculture, fishing, Hori culture, forestry. Grameen chatbot uses HTML, CSS, JavaScript technologies for building the Application

Chatbot System for Universities

03/2021 – 09/2021

The college inquiry chatbots will built using artificial algorithms that analyze user's queries and understand user's message. the response principle is matching the input sentence from the user. the user can ask the question any college related activities through the chatbot without physically available to the college for inquiry.

INTERNSHIP

Sustain World

Worked as an intern for Sustain world by building sustainability assets based on ESG, GRI, ESRS, BRSR frameworks.

COURSES

* Fundamentals of Full Stack Development

EXCELR

* Python 101 for Data Science

IBM

* HTML and CSS
